Interviews | Desk Work | Meetings
	Activity	Description	Category	Phase	Priority	Outcome	Dependenc...
1	Product evaluation	evaluating product vendors on their capability and requirements fit	System / Architecture	middle		decision on which vendor to take (if so)	
2	Architectural solution	Overview of architectural components, interfaces and their responsibility	System / Architecture	late			
3	Initial workflow harmonization	Define the first workflow that is going to be developed in the new system	Requirements	early			
4	Strategic system decision	What direction do we want to go with the FCMS as far as the 4 current systems are concerned	System / Architecture	early			
5	Migration planning	How are we going to move the data from legacy to new system	System / Architecture	late			
6	Rollout/Cutover planning						
7	Research planning	UX research goals, activities, and resource requirements for interviews	UX	early		Research brief, guides	
8	Shadowing download and desk research	Collate all the existing notes from the shadown sessions, transcribe, code them and label gaps	UX	early		Insight summary, initial pain point heat map	Provide all shadowing artefacts
9	DevOps process design	collaboration, tools, methodology for reliability and automation	Technical	late			
10	User research - Interview tracks	Contextual interviews, additional shadowing where gaps exist, surveys, stakeholder interviews, the prior shadowing session.	UX	early		Raw data (notes, transcripts, survey results)	Insights from the shadowing sessions and stakeholder IQ, reports from Helpdesk/Call center
11	Synthesis & modelling	Affinity mapping, personas/JTBD creation, user-tens journey map	UX	early		Insight clusters, personas, journey map v1 as is from users	
12	Opportunity Framing	Convert pain points into opportunities, prioritise for effort prioritisation, backlog of UX opportunities	UX	middle		Prioritised UX opportunity list	Judiciary stakeholders score impact
13		Areas of harmonisation - Map the current-state system of areas of harmonisation (discussed in the workshop) where steps can be unified, adapted, or must stay bespoke	UX	middle			
14	Concept ideation and low-fi prototyping	Co-design sketch workshops for to-be flows. Paper/clickable wireframes	UX	middle		Low-fi prototype, design rationale	
15	Early validation	Guerrilla / hallway usability tests + Nielsen's / WCAG quick scan	UX	middle		Findings log with severity, iteration decisions	Grant access to prototype/wireframes to test this with
16	Accessibility	Plain-language audit, readability testing, contrast/colour-blindness check, jargon rewrite with legal SMEs	UX	middle		Accessibility & readability report, plain-language rewrites, WCAG issue log	We might have some notes from shadowings with ALJ. Leverage and build on top of that.
17	Info architecture, content strategy on pages	Content guidelines (inc voice and tone), tree testing,	UX	late		IA sitemap, preliminary content model, style snippets	Supply existing content, policy constraints, Review of IA proposals
18	Benchmarking, metrics	Define success criteria	UX	late		UX KPI plan	Approve KPI measurement plan with stakeholders, analytics team
19	Synthesis playback	Consolidate insights, design rationale, UX vision storyboard, backlog hand-off	UX	late		Discovery UX handoff pack, prioritised backlog, research folder link
