5 Aspects of Health

1. **Learn well** – Screen Time
2. **Eat Well** – Nutrition
3. **Exercise Well** – Physical Activity
4. **Sleep Well** – Sleep Habits
5. **Smile Well** – Oral Health

Bond Well Message

Connection helps your child's well-being – Strong relationships with friends and family can strengthen emotional well-being, resilience and overall development of your child.

13-18 y/o Message 1

13-18 years: This stage brings greater independence as your child develops their own identify. Stay connected through open communication and trust to guide them in making positive choices.

As a Parent/Caregiver, encourage balanced meals, regular physical activity, sufficient sleep, and purposeful screen use. Your understanding and steady support build their confidence, resilience, and lasting healthy habits.

Learn Well

1. **Have open, non-judgmental conversations** with your child about their experience online and what appropriate, quality content looks like and encourage them to tell you if something feels wrong.
2. **Help your child navigate the online space safely**
   a. **SET boundaries** by guiding your child to adjust privacy settings on the social media and gaming platforms.
   b. **Guide your child to THINK before they act** to help them understand the consequences of posting inappropriate content online.
   c. **Encourage your child to REPORT inappropriate content** to the relevant authorities, online platforms and/or trusted adults.

13-18 y/o Message 2

13-18 years: This stage brings greater independence as your child develops their own identify. Stay connected through open communication and trust to guide them in making positive choices.

As a Parent/Caregiver, encourage balanced meals, regular physical activity, sufficient sleep, and purposeful screen use. Your understanding and steady support build their confidence, resilience, and lasting healthy habits.

Eat Well

1. **Provide regular, balanced meals to support your child's growth,** using My Healthy Plate for portion guidance.
2. **Make plain water the default drink.** Offer low-fat plain milk and if SSBs have to be served, choose HCS or Nutri-Grade A or B drinks to reduce sugar intake.
3. **Be a role model, taste food first** before adding salt, sauces or seasonings at the table. Guide your youth to choose lower-sodium products with HCS to reduce sodium intake.
4. **Guide your youth to make healthier eating easier at home.** Keep fruits and vegetables accessible and avoid stocking up on food and drinks high in fat, sodium and sugar.

13-18 y/o Message 3

13-18 years: This stage brings greater independence as your child develops their own identify. Stay connected through open communication and trust to guide them in making positive choices.

As a Parent/Caregiver, encourage balanced meals, regular physical activity, sufficient sleep, and purposeful screen use. Your understanding and steady support build their confidence, resilience, and lasting healthy habits.

Exercise Well

1. **Find a common activity or sports** of interest to do together in a week (e.g. playing pickleball / paddle, frisbee and cycling)
2. **Role model an active lifestyle**: Show your youth how you incorporate physical activity into your routine, and invite them to exercise together.
3. **Show support** in your youth's choice of physical activity or sports (i.e. encouragement, investing in equipment and/or be their training partner)
4. **Set time** for physical activity as a part of your family routine: schedule exercise like any other priority (e.g. brushing teeth)
5. **Consider technology within limits as an option** to enable physical activity participation (e.g. Pokemon GO, virtual runs)

13-18 y/o Message 4

13-18 years: This stage brings greater independence as your child develops their own identify. Stay connected through open communication and trust to guide them in making positive choices.

As a Parent/Caregiver, encourage balanced meals, regular physical activity, sufficient sleep, and purposeful screen use. Your understanding and steady support build their confidence, resilience, and lasting healthy habits.

Sleep Well

1. **Remind your youth to get sufficient sleep to recharge and have a regular sleep routine** like consistent bed and wake times, even on weekends.
2. **Encourage good sleep hygiene habits** e.g. have regular exercise, limit caffeine or late-night snacks, put devices away 1 hour before bedtime for better quality sleep.
3. **Have a conducive sleep environment** (quiet, cool and dim) **for restful sleep.**
4. **Role model good sleep habits.**

13-18 y/o Message 5

Dental – Oral Health CTAs and Ideas for Parents

Call to action	Ideas for parents
• Brush independently once in the day and last thing at night, using a sufficiently fluoridated toothpaste (1450ppm).	• Your child may brush independently! It will still be good to occasionally check in with them to ensure that they are still brushing twice a day for 2 minutes each time.
• Regular dental visits help catch problems early and keep track of your child's risk of developing oral diseases.	• If your child is still in secondary school, you may continue to sign up for the school dental service for basic dental services (find out more about it here: https://www.healthhub.sg/programmes/school_dental_programme) • Read the Oral Health Assessment Report and practice the tips shared. • After secondary school, continue regular check-ups with your family dentist to keep your teen's smile healthy.

• Adopt tooth-friendly food and drink choices and maintain regular eating habits with three main meals and no more than 1-2 snack breaks a day.	• As your child becomes more independent with their food and drink choices, continue to guide them toward tooth-friendly options. Support them in maintaining regular eating habits by having three main meals and encouraging them to keep sweet treats to mealtimes. If snacking, remind them to limit snacking to no more than 1-2 snack breaks a day.
	• **Pick Healthier Snacks:**
	  • If your child feels hungry between meals and wants a snack, encourage them to opt for tooth-friendly snacks such as nuts or whole fruits. They may also look out for foods that have the Healthier Choice Symbol with the *"Lower in Sugar/No Added Sugar/Sugar Free"* label as a guide when purchasing their own snacks.
	• **Rinse After Eating:**
	  • Remind your child to always rinse their mouth with water after consuming food and beverages (other than water).
	• **Choose Smarter Drinks:**
	  • When they are out and about, advise your child to opt for tooth-friendly drinks such as water, or drinks that have Nutri-grade A or B as they contain low to minimal sugar. (Nutri-Grade Directory)
	  • You may also encourage your child to bring their water bottles whenever they are out. Having water on hand makes it more likely for them to choose plain water over sweetened beverages, and they can also use it to rinse their mouths after meals!

Thank you!
