02-26 Workshop: Parenting Teens, Phone Rules, and Healthy Routines

2026-02-26 14:06:36

00:00:02 Speaker 1
Yeah. Oh. Yeah. How are you today?

00:00:19 Speaker 2
Good. A bit? Yeah, very excited? Yes, I am. Have you attended a session like this before? I.

00:00:42 Speaker 3
Know it’s a lot that you’re looking at. It will be fine. Talking about kids, is it fun?

00:01:05 Speaker 3
Temperature is okay, warm or too warm? Okay.

00:01:37 Speaker 3
Hey Good afternoon everyone. I know everyone might be some who have eaten food coma just like us. So our energy is a bit low, but don’t worry, uh, our day is gonna be much more productive. So just a couple of introductions. Um we have our research team, so don’t be scared. I know it’s difficult, but because since there are eyes looking at you, they’re like no don’t worry about that. So welcome to our session for today, and thank you very much for attendingum. What, we are going to achieve for today is that we want us or we want you to be encouraged into um activating the abilities of your youths and also like on your end in terms of like how do we even improve their healthy habits, right? Because it’s one of the topics that we have been talking about I’m, not a parent yet. So I would like to be educated and have plans.

00:02:32 Speaker 3
Not this, I mean not immediately, not like next month, But it will be a very, very good learning for PSW on how to navigate this space. I think we have like a couple of people. Um, I do not know. We were going to do some introductions um on that. So very, very quickly. Let’s do introductions um name. And also like, what is the age of your kids? So who wants to volunteer first? If not I’m just going to forcefully choose someone. Like I always do.

00:03:01 Speaker 4
I can start. My name is Kartika, so I have one daughter. She is now uh thirteen years

old, secondary one.

00:03:10 Speaker 5
You go next. Okay, choosing you. Hi, uh Ryan. I have uh three kids: eighteen, thirteen and twelve. Yeah.

00:03:22 Speaker 6
I'm Haiza. I have two kids: twenty two and sixteen secondary one and secondary one.

00:03:30 Speaker 7
Hi, I'm Jonaina. I have three children, um, fourteen, twelve and nine. Yeah. I'm Melinda Ngok Wah.

00:03:40 Speaker 8
Sorry Farah? Sorry Farah? I got four kids. Uh the first one is twenty five, twenty one, thirteen and ten.

00:03:50 Speaker 9
Kelvin like one kid fourteen uh fourteen years old.

00:03:56 Speaker 3
How many kids do you have?

00:04:08 Speaker 3
I Am Chris. I have three dogs, not here, but they're back home. Quite a lot. They're very like a handful, but I think it's just different with humans, I think and I have to be for sure extremely different. So yeahum Have you read the books already? Like the ones that we have uh given to you? Yes.

00:04:29 Speaker 3
For sure, like some things might surprise you, some things you're like maybe not. So in order to refresh your memory on that, We're inviting our teammate to narrate them again. And then we're going to ask your reactions.

00:04:44 Speaker 10
Okay. What's next here?

00:04:48 Speaker 3
So we start with the parent first? Yeah, this covers this one.

00:05:05 Speaker 10
This is my child, Adam. When he was little, we knew what to do. From young, when we trained him to eat everything. Balanced diet, what to buy, what not to buy and how to use his money wisely. Then one day we gave him a phone and then go to school alone. After they finish the PSLE they will get their phone. He can go to school himself.

00:05:38 Speaker 10
He spends time with his friends now. Wingstop, McDonald's, Haidilao. When they're in school with their peers, I think they eat nonsense. After school, he mostly sits at home and uses his phone. We don't know if he's sleeping well. After his C-Lab training in the evening, he will get home and use his phone to chat with friends.

00:06:08 Speaker 10
We ask, "How was school?" "Fine." He's talking less to us. Not as much as compared to the past. At this age, we cannot control already. We want to be there, but we don't know how. They don't want to be seen as mummy's girl. They want that independence. But yet they want the recognition from parents. We need to learn how to reach them differently.

00:06:39 Speaker 10
We need to learn how to talk to them. You can't talk to him like a child, thinking that whatever you say is okay for him.

00:06:51 Speaker 3
So that's the point of view of a parent. So, of course, the most difficult thing people like to hear your reactions about the parent quote. You know, Does it sound familiar? Or do you think like there are things that are a bit like. Different in in maybe like in how we do these things. So let's start with the familiar. Then who here feels it's familiar? What are the things that you found familiar?

00:07:25 Speaker 7
Almost everything. Yes, I mean you start to teach them the poems when they are like P four P five. And then you start from there, And then they start to hang on the poems after school, and it's all they want to do.

00:07:42 Speaker 3
How about the kid, how about the parents who have like two different age, you know. I remember, like you mentioned that your kids are quite like theeldest and the youngest right. So, what do you think is from there? Or what are the differences that you have seen?

00:07:58 Speaker 8
Because I'm strict to my kids. So basically it's the same. Like phone, uh they only can have after set one. So it's the same rule.

00:08:11 Speaker 3
It's the same throughout, even like the older ones. Same rules apply for all.

00:08:16 Speaker 8
Yeah, But sometimes I have to break the rules because the older one will say it's not fair. How come this one quite near? It's like okay, but I will reason with them. I say because of this reason, that's why I relate to him. So they understand.

00:08:35 Speaker 3
Who else wants to share very strong emotions about the story that we have?

00:08:42 Speaker 4
I only have one, so I wonder because uh it's very difficult to read her. So she needs friend and but friends are not always available at all times. So she sometimes goes to mommy, go to the titty and that's the cutest time of the day. Yeah, But then she just quickly distance herself again with her friends and without that siblings buffer.

00:09:10 Speaker 6
It's very hard because it's one to zero. A complete switch. So the boy is more like a bit of what is inside here, uh, more to the phone, message after come back from home. Uh, talking with friends late into the night being uh the games or internet. Yeah. So that is the different situation that we are having.

00:10:03 Speaker 3
Just on gender, you see a difference between your female kid and your your boy, right?

00:10:10 Speaker 5
Uh, For myself, my three kids have my three kids are all have different characters. My elder boy has the same character as me. That might like to watch football at my uh when I was young, I used to watch football at my friend's house overnight. Just like me when I was young, but second is a girl so. Girl is more fragile. I should say, because yeah or prone to be get bully, get uh set the says only I mean. So I no offense to ladies, but more prone to be more nice than the son. So I have to protect her more as a as my daughter. So I'll be more uh strict on her to protect herself. So uh, But to learn that ask her to be uh away from the social media more because a lot of you know, social media nowadays, people like to stalk on them on their Instagram, what they do and Facebook. So I try to stop her from using uh social media as much as possible.

00:11:09 Speaker 5
As my youngest one is a boy, so he's being the youngest. He's mostly on spoiled child by my wife. Yeah, It's also she very she know how to stick the bound when things get rough or get tough. Yeah, So as a as a father, because we go to army, we have to be regimental. We have to teach them the hard way also, So the girl will actually always complain to us saying, hey, why you always protect the boys. Let them do whatever they want, but girls cannot. I said no because girls are more fragile. I keep telling her, you must be away from the outside world as much as possible. Yeah, That's why until now I make it a point that since my daughter is in Hong Kong, So I make sure she go and fetch her from school to and from school yeah, to protect her in a sense. But my relatives and my mom keep saying no, you cannot be forever protecting her. She must let her be, yeah, so she know how to protect herself when she grows up. Yeah.

00:12:07 Speaker 1
Okay, one more Kelvin. Because everyone's spoken, so.

00:12:11 Speaker 9
Okay, I have uh one daughter, fourteen. This year's S 2. So similarly, um me and my wife tried to prevent her from getting a phone for the longest time until after PSLE. We said, yeah, we have to becauseum I think in the primary school, she will come back and say, even in Primary Two, Primary Three, she will always compare that her friend has a phone, and then we'll say, uh, you're not ready yet to have a phone. And also because she doesn't really need one, she walks to school, so we stay very near to the school. It's like a fifteen minutes walk. Um but um we kind of uh look at how she grow, she. She tend she she became independent pretty young. I would say, because uh from P three onwards, she goes to school herself and um going to school coming back. And uh, we from from then on, we didn't really um.

00:13:07 Speaker 9
Look over her shoulder, of course. Along the way, we we do guide her along and um. Similarly, we kind of let her grow independently, but along the way, we teach her a lot of skill sets to kind of be independent. Right up even to the point where we introduce the phone. We tell her about things like, uh, you know, there are scammers out there. What if you receive a message telling you to do this to? Or transfer money or things like that. Always, take a step back to to think that it. Um, What what was that message trying to tell you So? We we will um a lot of time share refer. News from uh probably Straits Times uh things like uh. A real story about people being scammed of a certain amount of money. And then uh, we run through with her. You know, these are the certain things that um may happen and they feel. So we.

00:14:06 Speaker 9
Give her a lot of real stories along the way to share with her. And at the same time, we of course look at her, but we don't really protect her in a way, but we give her skill sets to let her use herself along the way. So that's.

00:14:28 Speaker 3
About it. That's really great. Now it leads up to the next book, which is like the point of view of the kids. So. It's a very nice sharing session because now we have seen like there are actually similarities of like some of the struggles or challenges that parents are experiencing, right? But now we're going to view it from the perspective of kids. So Kiran, again, now I'm actually working everything. Mom and Dad,

00:14:56 Speaker 10
When I was little, you decided everything for me. My parents trained me since young: eat this, sleep at this time. Everything was set. During primary school, they walked me to school. Then I got to secondary school. Everything changed. In primary six, I didn't really have the freedom to go out with my friends or have lunch

or anything. I know what's healthy. I just can't always do it. I eat too much junk food sometimes. I never control myself.

00:15:41 Speaker 10
It's midnight, I'm still on my phone. But not because I don't care. When I stress and I cannot sleep, I go to YouTube and watch videos. My friends get it. They're going through the same thing. Sometimes my parents don't understand the situation. I talk to my friends, it's easier for them to understand, we are the same generation.

00:16:13 Speaker 10
How was school? I want the same more. But I don't know how. They've been coming home late ever since I was young, so we don't really have any bonding to do. But we do bond sometimes during the weekend. I still need you, just differently. If I have a good relationship with her, then I'll listen to her. It's relevant to everything else. The decision to let me do my own things can help me with future decisions.

00:16:50 Speaker 3
Okay, Anything surprised you about that story? Or it feels like also from the people, what is your take away?

00:17:00 Speaker 4
So? Very familiar because I also went through the same thing. So uh these like uh, I am expecting her to be less and less following us during the weekend. Ah, but for example, like last Chinese New Year, when ah she actually didn't want to go for the visitation. And my husband still didn't want to let go. I think usual right daughter. So ah she joined us, and she found a friendship and mahjong game with the same age.

00:17:37 Speaker 4
Uh, So we we we have a gathering same age group uh, and that's actually fun and I personally felt that yeah, it's good as well that she follow us, but it's not always the time that we have the same circle with the same age group of children who she can play with, but it is very important to me. It is very important that she has that time with the same age.

00:18:05 Speaker 3
Anyone else had a reaction to?

00:18:08 Speaker 7
The story of kids. Like my eldest is fourteen, I have two; he's a boy. So, he he wants to have an identity now, so they are asking a lot of freedom. He got his phone when he was five. So, the rest also want to follow the same p five point, get what point you know? And so for him means being a very pampered child first child, right, but we do have rules like okay, I do parent too. Limit usage of certain apps, and what is allowed, what is not allowed, what is age appropriate and not that stuff. But I mean there's peer pressure still. And he's a kind that is a follower kind of a friend. Easily influenced by friends. So, there's another point that I need to take note, always and

make sure that he's doing the right things and not getting himself into trouble. Which I think last year, he really got into a lot of trouble in school. I think I was also called by the parents in school like.

00:19:06 Speaker 7
Go down to the main office. You know, I was in the principal's office and all that inside. He is trying to be a hero, to help his friends when their friends are in trouble. That kind of uh sort of person, but he's a very nice boy. It's just that um at this age, they are really trying to get an identity as adolescents, right? So we also try to be on the same page as parents ourselves now and guide them as much as we can. You know, it's not.

00:19:41 Speaker 3
Anything else to share? So you have noticed like in the book, right? It touches upon like a bit of the healthy habits of of the kids. You know, like where do you set your phone? Also in the parent book, we we mentioned like McDonald's and Haidilao. I mean, Haidilao is so expensive even for myself it's so expensive. But other kids actually have the ability to go to Haidilao. Yeah and everything else and also like sleep time. You know it was also mentioned so you have food They have sleep, they have like phone usage. Maybe some kids will be active. You mentioned like your youngest is into sports, so the eldest is into sports. So we have seen all of that. So what is your perception of your kids? Do you think they are choosing healthy things at the moment, practicing it or not really? I see a lot of faces and I.

00:20:41 Speaker 3
Not really.

00:20:42 Speaker 7
I mean, as parents, I think we still need the dependency. I mean, of course in school they have times for CCA and all this, then they get breaks to go out to eat. Yes. And that's when they go, I know McDonald's mostly for their lunch. Other than that, if they are home, we are the one having the final say and try to have a give and take kind of thing. You cannot everything take away from them, nor can you give everything to them. So must find a balance lah, how they like there is a structured like fixed time. Okay. This time you have to pay. No phones after this time. So there are rules set for them to follow, but healthy eating wise, I thinkum at home is okay. If they are out with their friends, mostly fast food lah. Yes.

00:21:25 Speaker 3
I remember Sharifah mentioning like there's certain you're you're a bit strict with your kids. Do, they have a regimen of sorts, like they need to follow. Like, oh, you need to sleep or hey, don't use your phone too much, something like that?

00:21:40 Speaker 8
Phone after, from secondary one right, so the phone is for emergency. Uh, like you

uh reach school, you text me then okay. After that before coming back she they must tell me, Mama I going back already. So in case I need them to buy something or what. So I will text them, okay, go and go buy things groceries, or what like that, if I um but so far, she follow lah, but if I feel there's something wrong, like like she want to. Block me, but I don't know lah. I would tell her, I would randomly, I just said err on the video. Want to see where you are Where is your location So at the bus stop? Okay, on uh, I want to see what time can you check your timing for your bus So. She will check the bus and say that okay, I see it okay. The bus coming or not Okay, how many minutes Then like she said, okay, then she will tell me that she will go back with friends, So the friends. So what I must know who's a friend? And then uh what's their name?

00:22:39 Speaker 8
And uh, introduce them to me lah. So when the girls are auntie, uh, my niece she said okay. Uh, Can I show uh how you look like lah, and then they say, auntie. Uh my name is so they introduce so I know from the the friends, right? We don't judge lah, I told my my daughter, you just follow the good one. You will be good. One thing you, if that person is not good, you still have to be friend with them, but have your distance. The niece, you I mean she say you just together. But when when times you have to break out, You break out because there's you shouldn't have I don't like you and like this kind of thing. Okay, So everything is same just that maybe their bringing up is different and yours is different. So if something wrong, you have to tell them this is wrong. I think I do not want to follow all these things. So, we have to be firm. So she know what is right and wrong. So if anything's, she can check with me. I told her so um.

00:23:38 Speaker 8
Because they are just teens, right? They're just teens, so they need guidance from parents. Okay, like example, The first time they have a group gathering, like like they got somebody have a project for this class or individual. We will team up, and we do not know each other. First segment. So, she also got difficulties like I don't know who to choose or sometimes they don't want to choose me in the group. So I said it's okay you just go after that you, You tell them okay, what is their strength So, uh, I try to be one part of the the team lah. Okay, Your friend is good in coloring or uh like like writing or what So you segregate your your things lah. I'm not so good so much but this is some ideas ah. So I told them you do equal after that you discuss, then after that you cannot finish right Okay don't stay at school, sometimes they say want to stay back. I say.

00:24:35 Speaker 8
One thirty, you go back right? Okay, um maybe two. A half an hour, Forty five minutes after that you go back home, because parent will be very uh worried because some of them working you see. So how come your uncle have to stay back to do your project or this thing? I do not want them to go to McDonald's to do all

their uh project or this thing. So I tell them, arrange them, To tell them, okay, we would continue at home, but must start their parents after seven after their dinner. Okay, eight to eight thirty or eight to eight forty five, you do your project together. But the follow up is up to you. But I will be there right. I can see if they are doing the things. So parents also have the, The the um security that okay, my children is um doing their project, not they do not see, you know, go library. All these thing. No more library cannot discuss all these thing with him. So there's no such thing like me. You tell me, you go McDonald's McDonald's for them to eat, not for them to study. Okay.

00:25:33 Speaker 8
If you are at school, at canteen, okay I believe you. But all these things, no, no. So I tell them that kind of situation. Then she understand and tell your friends also. So they also understand. So I tell them now your parents not around at home, but come back home, safety wise, all these things you have to how the parents thinking of your. So you go back by the time you go back, then you tell like I finish a bit for discussion at class or school, then I continue. And. So parents also understand. So I tell them they got problems, instead of parents talk to me. So as a parents, We also have to be in the team. So we have to discuss okay, like like we have to know some of the parents so we can guide each other lah. This one thing.

00:26:17 Speaker 3
Hmm I like that because like up until now, because like I work overseas in Singapore, right? Actually like my mom wants to see my friends. So I'm like here are my friends, I'm thirty seven. So and thinking we will never go away which is why, It's kind of sweet, you know, like in my end I think it's sweet. So, uh, we also have um an activity because I know not everyone managed to speak, but it's fine. We have an activity in front of you that you're seeing right now. So if you look at the photos, right? So it starts from the very end. This is like I think for the three of you this is like. So it's sequential. It's like the day in life of your.of the kids.

00:26:58 Speaker 3
So you start, of course, morning. You see like six a m right? We're not sure if that's like the waking up hours, but we we kept it at six at the moment. The next photo is after school. It's like when they go out, maybe like two three p m And. Then the next scene is dinner with the family. And, then the fourth and last one is bedtime Right. So we go one by one on the scenes Um We want to ask you what is happening.

00:27:28 Speaker 3
On at home with your kids on the first one, let's spend time a bit, Probably five minutes to discuss on what is happening um on the first scene in the morning. Waking up. Waking up. We add waking up. So we add, oh, yeah, we have less. We add waking up and then what happens when we when you wake up? It's fine, if you are not similar, because like I think your your kids would have different. Different ways or or different things happening right.

00:28:01 Speaker 2
Yeah, I think I'll take to this kind of yeah.

00:28:07 Speaker 3
So, we can discuss this is the group. And then we discuss first this one, what happens in the morning.

00:28:14 Speaker 2
So just imagine your child go through from the morning until the night, we just want to know what's happening now.

00:28:26 Speaker 2
And then,

00:28:30 Speaker 1
So I point.

00:28:32 Speaker 6
It a little bit right, and the rest of them they still have to come. They didn't come for my morning show, and then I encourage them to breakfast.

00:28:46 Speaker 7
So many they go. How about you? Is it also same?

00:28:49 Speaker 4
No, not my daughter doesn't really really anymore. So she so when, Sometimes she wakes up on her own. She said biological clock. But usually I fall,

00:28:59 Speaker 7
But if we wake her up, she quickly do her things. So breakfast is always ready. Uh, sometimes she pack it. Maybe every day different hours because the school somehow has different hours every day. Yeah so.

00:29:22 Speaker 4
Basically, She just needs to get ready about fifteen minutes before the school starts uh, to catch the bus. Yeah, and then we send her to the bus stop as well. Yeah. Um It's still very dark usually. So even though she's already in secondary school, we just feel that it's also a good five ten minutes walk together as a family.

00:29:42 Speaker 9
Like she is okay, so she doesn't really immediately wake up,

00:29:46 Speaker 2
Then probably what usually you mention about breakfast or like how long.

00:29:50 Speaker 5
Okay, for myself, uh, although I set the time is six thirty right. His kids they will try to

be lazy. Doesn't want to wake up because they sleep very late. They will use the phone. They will talk to siblings until eleven o'clock then sleep. That's why the next day morning, although the breakfast is set on the table like a mummy, but they still don't wake up. They will sleep like a like a, Purposefully, crack the time until six forty five. They know it's already late. No time for enjoying a slow breakfast. Then they will jump jump off the bed or if not, The mummy will scream at them, and then they will wake up because when I talk to them, they will wake up. Then if mummy doesn't scream doesn't help, Then mummy will use the plushy toy to act like an animal to say, hey, hey, you need to dream me or the plushie dream me, and then they can go wake up. Yeah. And.

00:30:46 Speaker 3
So we have prepared cards here. Yeah, You can read them one by one, because we want to capture. Okay. What's difficult at this period like in these ones place. So you can take the cards there that meaning behind them.

00:31:17 Speaker 3
Okay, Once you pick a card, right? Then we can discuss it. Then we just like.

00:31:21 Speaker 2
Take notes. Based on what you've shared just now, you know, Like they wake up, some have breakfast. Some don't have breakfast and they they haven't,

00:31:33 Speaker 5
But they just later. So these are a few uh challenges that could.

00:31:44 Speaker 2
Influence how the first picture, yeah, how in the morning when they wake up, you know. Yeah. Oh yeah.

00:31:53 Speaker 3
Because if you want to know more about what it means, you can turn it into a sense. Yeah. Mixed cards? These are cards that you haven't read yet? Because uh the moment that she wakes up, just like we do,

00:32:04 Speaker 4
She checks her messages. Okay And sometimes she just get, Overdone it as in she will also check the games, notifications. She will play a little bit here and there. So so sometimes, but it's not me usually Daddy will be quite uh. Daddy will be quite strict about this. Yeah.

00:32:27 Speaker 2
So I will put it here. And then if you can write like a few descriptions of why do you think that's yeah? Why? Did you choose that? What do you want me to write? There is a sticky note here. Try to speak, Yeah, yeah, yeah. Okay. You can choose as more, yeah. Oh here.

00:32:42 Speaker 3
Anything to. Yeah. Are you experiencing any difficulty in urinating?

00:32:51 Speaker 2
How did she know the first thing that she will do is check the messages?

00:32:56 Speaker 4
That's the first thing that she does. She will pick up her phone, Bring it to the toilet checking messages in the toilet. First. Then after that, while she's. Yeah while while she's changing her clothes, she just keep on. Checking the phone. If nobody reminds her,

00:33:10 Speaker 1
So when she's on a.

00:33:17 Speaker 2
Yeah, You can write like, why do you need to be on your speaking on here? Okay, yeah, like little bit more of instruction about yeah. And then you can put your writing.

00:33:28 Speaker 7
Stuff at the back.

00:33:32 Speaker 3
So This one's like your kid wants to be convinced that way? Yes. And this is also happening in the morning time. Morning, not really. Yeah, but recently I do. Are those you in the morning? Do you think like anything relating to the morning? I think I like that your kids are quite have a routine. They wake up on time. It's good if it's like there's no tension happening here. So there's no so it's at what do you talk about in the morning?

00:34:13 Speaker 1
Okay.

00:34:52 Speaker 3
But, This kind of thing is very difficult because I have to say we are not a very good role model.

00:35:00 Speaker 3
Because we also do it. But what makes her like choose the phone first? Because like, I kind of want to know, like, oh, is it because of is it beside or I don't know. It's just automatic an automatic response for me.

00:35:16 Speaker 4
For me, it's also automatic response. But then uh kids they are just parroting of what the the parents do.

00:35:26 Speaker 5
This is the seat for the she just doing normal. Oh, no, sorry, we usually get.

00:35:32 Speaker 2
Thank you. Sorry. This okay.

00:35:40 Speaker 3
Okay. We have a very, Miss, a very healthy. They don't have problems yet in the morning. In the morning just yet. Just yet, that seems like the other scenarios I am already picking up from Sharifah right? I need to check on her.

00:35:58 Speaker 4
She's here quite well with her friends. Yeah yeah yeah. I did the same, but it's like Yeah, but it's not deliberate. It's not deliberate like you do, but maybe it's good to just say it out. Hey, can I check? Can I see your friend? It's really also curious. I want to be introduced as well, but now it's more like picking when she's having the group project. Okay, that's a good thing.

00:36:21 Speaker 8
At least you got one. You got another another uh girlfriend There was the first girl, your daughter laughed More.

00:36:30 Speaker 3
Okay Uh. Irman did we take a photo already? Oh yeah Oh okay, Has our son.

00:36:41 Speaker 4
It's quite peaceful actually.

00:36:44 Speaker 4
Yeah, Since since primary, I mean since secondary school, it's quite peaceful. I don't know why she wakes up by herself, she does things by herself. Nobody needs to like answer to rush. I just say that you're going uh, you are going to be surprised because in the past uh, the school is very near, so we don't need uh so different. She believes in. I think she knows her. So, She there was once that she panicked because somebody pushed her and pushed her off of the bus. She couldn't get back in. She called me panicking that she will be late. So, I think that's the motivation; she doesn't want to be late.

00:37:35 Speaker 11
So When you write on a sticky note, we're not checking grammar. We're not checking anything. It's fine. You on your own words, it's okay. No right or wrong. Yeah. Quite a few, yeah Okay, We move to the next scene. Now it's like after school, you know, School is done what is happening. So.

00:38:02 Speaker 3
What do you think is happening after school? Now this is quite big. I think for quite

a lot of parents, this is they're prepared already. What is happening during school and you okay normally what what is really happening? I want to ask everyone, What what what currently is happening when your when your kid is uh done with school.

00:38:32 Speaker 7
Yeah, schools right now, I mean the secondary schools right. They do not have a fixed time that the school ends. Every day is a different timing. Sometimes it's two thirty, three, three fifteen. Then, you know, CCA days is like three, and then you have CCA from like until six thirty.

00:38:46 Speaker 4
Oh And you have some kind of activities as well. They have school games that we don't know if they don't let us know. Yeah,

00:38:54 Speaker 7
Sometimes I don't understand what's going on on a daily basis. So I told my son just to me, I say, okay, I give you an hour to reach home at least. Ample of time. I mean, from Sengkang to Punggol is pretty near. I said, give it okay, one hour you must be home. I don't care. You know this is your time. So, at least he also knows that we are looking out for him. And then I just look at the timetable every day and say, okay, three o'clock, okay, four o'clock must be home already. Why is he not home there? Then I'll text him, where are you? Yeah because I'm a bit more flexible, the father is a bit more very, very strict. So then father and son, okay, conflict, oh, yeah. So so I have to always step in before something happens next.

00:39:30 Speaker 7
You know, a referee protect the child, also protect. Yeah. So usually at the school, can I go? Most of the time you'll come in and ask the same thing every day. Can I go with my friends? I say no, come back. I used to let him, but now I said no. You just stick to this one hour and just come back home. Yeah.

00:39:50 Speaker 5
Okayum for myself, uh like my Malaysia have three kids, right? So my elder boy he was left alone in Singapore back then. With my mom during my two years work in overseas, yeah. So I only brought along my two younger kids and my wife. So after school, He normally, you know, I will give him a week of allowance so that he can survive during his CCA days. And after school, we be there. Uh back then he was studying in River Valley Primary School, so opposite is a River Valley Mall, So he can actually get a meal easily at before going back home in Punggol. So there was a couple of times.

00:40:28 Speaker 5
As he knows that he has the freedom, his courage become to build a big way in a sense. So, he'll keep testing water, saying it. I have used up my allowance. I I was a bit suspicious because I give him quite a help. Ah, normally I give him about two

hundred dollars a week inclusive of this sense. Yeah, because ah yeah in different time zone, I know she's in US. He's in Singapore, So I don't want him to call me in the middle of night when I was sleeping, because I need to work shift also. So, I don't want him to affect my sleep, or he come and tell the mommy, "Eh, not enough." So, I'll ask him. The main P O C is myself. Don't come and disturb your mommy because your mommy is taking care of the two younger siblings. So, I was a bit strange. I was a bit curious. Hey, how come? Give two hundred dollars in a week has so far been each other. Not even a cent. I was quite curious Yeah yeah so not anymore.

00:41:22 Speaker 5
It's like, I'm sorry, I don't want to offend. If I tell people like, "Do you have a son?", it's like I'm feeling a mistress. So it's just a joke. Don't offend. Yeah, so I just casually tell my colleague say, "Hey, you talk about someone? " He said, yeah, only a mistress no lah. So no, he's my boy in Singapore say he is studying alone here, so okay, never mind. So as I can't be because of him. Travel back to Singapore to stalk him, what he's doing. So I get my mom to actually stalk on him. True enough, He is he's not sending on uh like games or Pokemon or whatever a lot. No, he's actually treating his friends meals. A girl somewhere. Oh okay okay no it's okay it's okay winning her? No no no okay I was questioning eh how come you treat the girl?

00:42:19 Speaker 5
Meals at the time after school. I mean, I'm curious. I mean, I treat him as my friend. Talk to him. Yeah, I don't want to straight away, scold him because I know scold him right away. He will be very defensive one. So, I said, Hey boy, what actually happened Can you tell me what happened? Am curious to know. I mean, see why can help Yeah? Maybe if if i can help maybe by giving more allowance, maybe i i'm okay with it. So, he told me that the girl, actually the parents doesn't give enough pocket money for her, so she he sympathize her, yeah. So, so I was talk yeah so I talked to my mom I said eh, Uh because I hardly got a chance to talk to him back then. So I asked my mom, but but my mum you know, grandparents normally will protect their grandchildren. So he said eh no you shouldn't um confront him. You yourself is a same similar example because back then when I was young.

00:43:12 Speaker 5
I also sympathize people, my friends who doesn't have enough pocket money, to give them money to buy food. So he's actually following your footstep. Yeah, so after that incident, I learn my lesson that yeah, I mean my two younger kids, I will tell them try not to go out and eat. Yeah, I mean some people they would. I mean, not all some may take advantage at him. You treat me once maybe you I can ask you for treats for more often. Yeah, um not stopping him to treat people food, but just like. Try not to go out as often as you because some people they may just take advantage. So, The two younger one I'll tell that uh in another way is that uh you, instead of going out to eat, you can actually save your own pocket money. Then in a sense at end of year, you can buy yourself a big gift to reward yourself. Yeah.

00:43:57 Speaker 3
I like the stories that we are sharing at the moment, but also like I feel like a lot of emotions as well for the after school. So I think we're gonna have a lot ofum sticky notes as well on that. So again, same same. You know, okay. What I'm gonna do is like let's put it like this and then write anything, any word that describes your challenge. Right?

00:44:22 Speaker 3
Yeah. So I will push it in here. Okay, next next thing will be coming Mr.

00:44:28 Speaker 2
Okay, other challenges that you think is it different? Yeah, different design. Need to yeah yeah right what do you mean by different design? Okay.

00:44:44 Speaker 5
Just write based on my experience.

00:44:47 Speaker 3
Anything that comes up immediately in your mind, that is Okay.

00:44:56 Speaker 3
And then if you have something, right, you just put the sticky note on where it is related.

00:45:18 Speaker 1
Yeah. I think it's more uplifting.

00:46:47 Speaker 3
It's More on she budgeting for okay money. She agrees like it's like for her, it's difficult to find healthy food.

00:46:58 Speaker 9
With the same amount of money. Actually, the fast food is like the cheap stuff lah, you know. And then she always says that uh, you know, healthy food is always expensive. Mhm. And actually you look at it it's pretty true lah.

00:47:11 Speaker 3
Mhm So your your she tries She tries to.

00:47:15 Speaker 9
But uh there's always a tension that comes out Yeah That. She will eat So like a meal, usually costs ten bucks, Yeah Usually ten bucks is yeah,

00:47:26 Speaker 3
It's quite high as well.

00:47:28 Speaker 9
Usually, probably ten bucks to get like two two bucks pack, that kind of thing is usually the. It it is for a meal, but if you look at it holistically. Even the eight bucks right most of the time it's not really healthy food. It's just uh normal. Because if healthy food, we're talking about organic food and stuff, definitely will pass your ten bucks. Yeah, That's for sure.

00:47:54 Speaker 3
That's good information. Yes.

00:48:03 Speaker 3
Anything to else else to add before we go to like the next two. Okay. Let me just take a read at your cards later on. You can actually viewum on on everything. Can you maybe explain on the thing that you clash on the after school? What are the things that.

00:48:26 Speaker 6
Likeum I see usually uh. We give him like some time to come back. Yeah, but he will always be late. So if you call him, he say he's on the way lah. The bus later there is star there lah. Always have a always have a good reason for for being late, whereas actually it was with his friends lah. Uh huh. I see. I see. So that's yeah. That's the thing lah. That's that's why uh for him. Uh.

00:49:02 Speaker 6
Because, actually, ah, after school is quite difficult for us to to. Ah. To get involved on what they are doing. Frankly speaking, Because they got a lot of activities, the school hours also not not fixed ah. So for me, myself, because I'm more strict than my wife as usual, the wife will always favor the boy. So for me. I plan to get more involved in his uh uh in his school by uh contacting his teacher. Uh, So that means every single bit of uh mistake or every single uh thing that he do. Uh, if there's wrongly, the teacher will inform me first instead of my wife.

00:49:56 Speaker 6
Oh Okay so. That's why uh like what she said lah, we are famous at the school actually. Always being called to the school because of some discipline issue everything lah. So, but by being more involved in in the uh school itself, so it makes like uh easy for us to communicate. And also uh the teacher is able to inform us like in case.

00:50:26 Speaker 6
There's something always is full of friends, because that that's what happened because the teacher did uh, Advise us that okay, this full of friends is uh quite not good for him. So try to avoid. But like I said, We try to advise, but still there is that pull of friend. He still uh, he still uh mixing around with lah, although although they are not doing uh anything wrong, but um I mean the the influence of uh.

00:50:57 Speaker 6
The influence of uh bad attitude is all there now actually.

00:51:03 Speaker 3
So I've seen like in the morning, right? It's uh we have noticed like you are all quite present in the morning on your, like, you know, the routine and and everything. And then we have seen, um some of your kids who are, Um able to even like wake up by themselves, you know, like breakfast, sometimes on and off right. But for after school, how would you describe your. Um, your parenting in a way. Are you more present on on the after after school or more of like I'm gonna, let go a bit. Who says like they're more present in the after school? You can just like raise your hands. Okay, who lets who let goes a bit on on the after school? Like okay, Like you know, I would I would let you like maybe do your own thing.

00:51:52 Speaker 6
I mean we we did get try to be to be more uh, Passive on their location, on their invite. Like I said is quite difficult to to, To detect that unless you are the one who okay, you got to fetch them, you got to send them, uh then then you are able to control that situation. But, if they are the kind of they're going to school uh on their own, come back on their own. Then uh it's it's quite difficult to control that situation because.

00:52:25 Speaker 6
Uh, after school, uh, the guy just okay. Uh, I follow my friend go seven eleven. Uh, do McDonald first lah. Uh then after that, hang around at the at the seven eleven there, um then uh say bus late lah, but because we we don't know exactly yeah, we we call them I mean, we call him, ask him, okay, where are you? Yeah at the bus? But at the bus, forty five minutes later, he didn't show something like that.

00:52:54 Speaker 8
But my my doctor is a bigger got to right. They, they tell me that don't worry. We, if you find something wrong, right you detect, you know that they can do when yeah. You just stay the occasion like a tracker or yeah so we can detect.

00:53:11 Speaker 6
That's the different because with my with my girl, Yeah, very time. Okay you issue by this time yah he issue she she issue by this time. That's why I say it's different taking care of the girl and taking care of the boy. Yeah, it's totally totally different situation because the girl will listen to you more, but the boy will rebel to you.

00:53:36 Speaker 3
Now it's making me reflect because it's just me and my brother, and my brother is the youngest. So I'm like, I think I'm like It's similar when I was like younger as well. Yeah. Okay, Now we're gonna do a combo because like we have also like quite a bit of stuff. So we're gonna do a combo of these two. So you have the dinner time and

the bedtime. So now we tackle this, right? What is happening during uh mealtime? Also on bedtime. And, then you tell us like what is the most challenging part of of this?

00:54:16 Speaker 3
Scenario as well. I think this one we can discuss with our group on that. What's currently happening in your in your homes with that?

00:54:43 Speaker 2
Just During dinner or both. Okay.

00:55:14 Speaker 2
How about other challenges in that point?

00:55:19 Speaker 3
So, do you guys do you eat together or with your family? Do you eat together before bedtime? No, no.

00:55:31 Speaker 1
After dinner time, what little. For me,

00:55:36 Speaker 6
We have a no food. Uh, no food when I go to work again. Right. It's it's.

00:55:58 Speaker 4
We Don't have dinner time. Very seldom that my husband can come home for dinner, but we always have TV time, and it's always full of discussion about the TV show.

00:56:12 Speaker 4
So typically, somebody is always guilty of checking on something. Yeah, and we always remind each other that, hey, you keep on checking your phone or something like that. But, it's uh the most peaceful time because uh I think just now you mentioned about being present and being active after the school hours. I tend to let go, tend to let her to invite me things instead as Some questions can trigger her, so I have already managed her emotionally before we reach the dinner time, before we reach the TV time. But during that time, it could be very intense because energy already runs very low, Her emotion already runs very high and being girl, sometimes she can be very focused hyper fixated on unpleasant experience.

00:57:10 Speaker 4
So it could be friends, it could be teacher, and she just keep on ruminating. And I still need to understand the balance on how to manage that instead of," Why do you side with my friend?" So yeah, Which I never intended to do so, but it can sound like that to her.

00:57:31 Speaker 3
Are you seeing because like you mentioned like oh she ruminates and everything. Are you seeing like body language? Like suddenly she put her.

00:57:38 Speaker 4
But they are teenagers right? They are always aggressive. They always say, they always say. Yeah, so the way that she speaks, I mean, again, it's I think it's all comes into what uh the energy is already very low. They're already very tired. Too many things happen at school so emotion could be very, very high at that time. Yeah So everything could be a trigger. So even though, but I think the expectation here is.

00:58:09 Speaker 4
I just need to listen. I shouldn't even be commenting that, uh, why do you need to do that? Yeah, maybe that's not a necessary comment. I just need to listen. And it's very hard to balance that. It's something that I need to learn as parents and yeah, Just just like us right coming back from work. We really need to fan out, but we don't want anybody to just. Why you do that to your colleague? Why you answer that to your boss? Yeah, But it's hard to balance it with the kind of educations that I want her to be. It's all bundled here. It's bundled all together, so dinner together with this. Then we have TV time. Yeah, then sometimes I just fall asleep.

00:59:03 Speaker 4
You know, there's a new feature in Cubos called select.

00:59:06 Speaker 7
Baby Aisha who's on the phone, you know, getting through to his parents. Yeah, I wanna have that like any sleeping area. Oh oh oh ohhuh?

00:59:19 Speaker 6
It just drains the battery so quickly. They need video quality settings and all that kind of stuff. So it's not like.

00:59:29 Speaker 8
Any like I'm gonna go to bed. It's more like.

00:59:35 Speaker 8
She's traveling.

00:59:36 Speaker 4
No, we have the family control, so we all agreed she was talking about them. That's it.

00:59:44 Speaker 7
She's not on the phone to her friends or anything. She try out for me TV games.

00:59:54 Speaker 6
Because they go some some time that she uh mobile games not.

00:59:58 Speaker 7
Tv is just a uh login there. And then it's a video chat. Actually, not so much about text. It's nonstop message. Very dangerous. Dangerous, very, very dangerous.

01:00:10 Speaker 6
Need this video call.

01:00:12 Speaker 7
For communication with the doctor? Yeah,

01:00:15 Speaker 4
And sometimes they say there is a group project, right? Okay, Group project now is very difficult if it's already turned 13 group project. What can I do? They say like that they're like.

01:00:28 Speaker 7
Yeah, It's already too late, right? But they say that it's a deadline. Very hard as a parent to say no, right? She she got it actually.

01:00:40 Speaker 5
Yeah, she already had the chat. So uh. But I can see I can hear is okay now. So everything seems okay, playing watching, still watching Netflix, and yeah, checking on everything my two kids. I try to link and sneaking into the system. Yes, I know. Scams everywhere because of a lot of unwanted attention from our Singaporeans. So, I always tell like recently, I purposely do the research. The crimes are on the rise because of more more raping cases.

01:01:24 Speaker 5
So you as a girl, you should put that. So as a man, I will check for. So if there's girls group inside the check group, they form their own girls in chat group. So check group class chat room. So I I don't want to interfere uh group conversation, But I just happen to see what are the five actually conversation because I don't want him, but don't have to conversing outside.

01:01:53 Speaker 5
Yeah, I Also purposely went to the school to give talk. So the principal knows me when I give a talk to the students. So, my daughter is going know that there are no principal when around school leaders around she doesn't she doesn't dare do uh,

01:02:10 Speaker 8
How to say like go against me.

01:02:13 Speaker 5
Yeah, for as for my smaller boy. He's a bit introvert, so he stay at home most of the time. He does have chat group inside the WeChat group, but I think mostly playing games on his phone and watching series. So I don't know if it's only my children or

something like that. Either yeah, very free in terms of homework done or not is depends on himself. Yeah, so by then she okay okay yeah so by then you like You see, it's time to go back and to sleep. So, so they come back. It's even like a lot of work. But she's a professional. I know girls are more professional than boys. I'm not saying you ladies are not saying that, but but ladies are more professional. So, All the positive is very good because you do things in a positive way. Yeah, in a complete way. But the what is this name of anxiety, then become very anxious. We also very anxious, then cannot control us.

01:03:40 Speaker 7
So, video check. But she's manageable for me. The time is always the loveliest time.

01:03:45 Speaker 4
Yeah, Because she's here, somehow, the tummy get loosen out during her almost bedtime and she's already covered. Yeah, That's why maybe management doing more before the bedtime is very important because after dinner, she's ready. Yeah, no longer hungry. So, yeah. So, emotion will be less intense.

01:04:27 Speaker 4
So, What Do you think? What do you think? What do you think? There's much opposition, But me and her usually she wants to talk to me more than compared to my husband. So when my husband joins, it's like I'm really like already in the middle of the topic. It's already done. That's that she gets annoyed, if my husband again, they want, you be there.

01:05:03 Speaker 1
Like this.

01:05:14 Speaker 7
So You are here on the screen and then somebody comes on, want to talk to you.

01:05:36 Speaker 4
Even always confuse some of that. Maybe I think we have to bear together. We bear together, not so together. Okay, okay, okay.

01:05:45 Speaker 5
I just discovered which is true,

01:05:47 Speaker 3
Which is true what everybody, you know, you don't have the control of so many limitations. Hey guys, I'm sorry. I know very passionate conversation, but we feel like we're school kids at the moment. Yeah, I feel like we're school kids with like filling out everything right? So you can see the sheet like in front of you. Now, Now we have seen like a lot of like tensions or challenges that you're experiencing from, like more I think this. This group is like calmer in the morning, but it's like goes into the evening. It increases right? So based on what you have written on like, uh, the

challenges you are experiencing choose, maybe three go beyond, like any number is fine.

01:06:33 Speaker 3
Of the most important for you to tackle. What do you want to solve, right? I know it's difficult. You're like, oh my God, I want to solve everything. But we need to choose three, I guess we can do three. So, you take that sticky note that you have written that you want to solve or if it's not there yet, it's fine. You can write new one and then you add it on the first column. First column is like which challenge from the board you want to tackle, because this is like the most important thing that you want to solve, right? And then the second column is what could help. So I know there will be like, oh my God, there are so many things that could help, you know. But yeah, think about it like oh, if I was a parent, what could I do? Or what do I expect from my kid as well to do?

01:07:24 Speaker 3
But maybe it goes beyond that. Maybe you're like, Oh, I want the school to also do this. So for this one, for the second column, it's fine if you add like four maybe one sticky note for yourself. Another sticky note is like for the children, and then maybe a third sticky note on like teachers on school on anything right, because we want to solve um the problem that, that you have or the challenges you're having. And then lastly. What do you want to change? What are you expecting to change in terms of their attitude or behavior, right? So, I know it's a lot, but let's choose one. So let's do the act of choosing one first. Okay, take a look at the board. Yeah, let's take Let's pick one first.

01:08:15 Speaker 5
You're going to do a column by column.

01:08:16 Speaker 3
Approach Column by column That way, you won't be overwhelmed. So, let's do one first. Which one do you want to solve, based on everything that you have written, or you can write a new one? Okay, I just do a continuation. I'm writing a continuation. Yeah, second order solution. Small.

01:08:47 Speaker 3
Now, you can write any one if you want, or you can check the board as well on like, oh, what have I written? What is like the most important thing for me to solve? This one. You can keep it. Thank you.

01:09:03 Speaker 2
You can use the second for a different.

01:09:07 Speaker 3
You're not limited to onlyum the challenges you have okay, you can choose like other sticky notes from other people as well. If you see like oh this is also

something of my concern, you can you can choose from from other people's sticky notes.

01:09:20 Speaker 2
So each of you have three of these paper. So you can select three if you need more then let us know, we give you more.

01:09:40 Speaker 2
Yeah, And then is there any other thing that you want to solve that you think is important? You can put in this in the second one. So one problem, one one paper. Yeah, okay.

01:10:06 Speaker 3
Everyone Has chosen theirum not yet. Challenges okay.

01:10:15 Speaker 2
If you need extra paper, let me know. We we can.

01:10:36 Speaker 1
Remind you to next more.

01:10:43 Speaker 3
You Want more paper to for problems to solve. Let us know we have extra. Everyone done? So, if you're done with the everyone is done with the first column, right, then you can move to the second column already. Thank you. Oh yeah, we have very extremely passionate people. Okay, we can move to the second column. How do you want what could help? What could help you? It could be like a request from your children. Could be like oh maybe I should also like, you know, do something. You as a parent or maybe a school, a teacher.

01:11:42 Speaker 2
Yeah, And also, if you can share with us a little thing that you could do to help them, also would be yeah.

01:12:06 Speaker 2
And Also if you can think like when you are busy, what you can do as well. If you have the time, what you can do, then it can help us to understand.

01:12:16 Speaker 3
Because not everyone would have time, right? So think about yourselves as well. If you can help out, if you cannot help out, what kind of support do you need from other people? It's also.

01:12:41 Speaker 3
It was like a some title of a movie. And this is from, request from your child or, no I think all of us.

01:12:58 Speaker 4
Have to do the same.

01:13:09 Speaker 1
How do you teach?

01:13:13 Speaker 4
It’s Really just a determination that I don’t want to check my phone. This is a protected time for our family, more than two hours or so. So.

01:13:22 Speaker 2
It’s like no solid, okay.

01:13:26 Speaker 4
Yeah, but again it’s very tough sometimes still need to check work messages.

01:13:34 Speaker 2
Oh this is you made it for you as mother or for No,

01:13:38 Speaker 4
For everyone even for her. Yeah, even for her, she also like got to bring to school. She missed out any project, any homework. So.

01:13:47 Speaker 2
So for this you think the two hours no phone time.

01:13:53 Speaker 4
Quite difficult, but Saturday Sunday maybe we can try.

01:13:57 Speaker 2
It’s like right now it’s always kind of like yeah.

01:14:12 Speaker 4
I hope I do. This is not so difficult.

01:14:23 Speaker 2
You Know, your colleagues or your friends, you know, your daughters’parents did that. We might think it’s interesting to make this.

01:14:33 Speaker 3
Fixed fixed dinner time.

01:14:42 Speaker 3
Is your child using the phone too much at the moment, or what’s the reason behind going this is like something you thought games.

01:15:03 Speaker 2
Yeah, then you can more yes easier for.

01:15:11 Speaker 9
Yeah.

01:15:41 Speaker 3
The way of inner time. Introduce that.

01:16:22 Speaker 3
Maybe I should do this as well. Maybe I should do it as like one of the things that I want to change for myself because I'm quite unhealthy, you know, and then I sleep late. That's why I'm like, oh, what if I have kids?

01:16:39 Speaker 2
Can see a lot of the conversation we had is really strong on, Phone. Phone screen time. Is it something that very obvious now among your children?

01:16:53 Speaker 3
Among kids, right? But it is also among us, right? I mean, we're also guilty in a way. If you.

01:16:59 Speaker 4
Want to find some, for example, you just want to book a ticket, right? And then you want to know whether it's cheaper or not. You can't actually calculate it inside your head. You really need to open up the calculator.

01:17:13 Speaker 4
We are so lazy to use our brain. If we want to write something, we just ask AI to copy it.

01:17:23 Speaker 2
Oh yeah, AI.

01:17:24 Speaker 3
AI actually yes.

01:17:27 Speaker 2
What do you think of VR?

01:17:29 Speaker 3
That's a controversial question. Because we did not grow up with AI at all.

01:17:35 Speaker 2
Do your children use AI? They ask AI,

01:17:39 Speaker 6
They use AI, they use ChatGPT or the other. Oh,

01:17:44 Speaker 4
They already know. They already know. I've heard her use it. Yeah, I teach her how

to use it properly.

01:17:53 Speaker 3
Properly, that's the key word like because.

01:17:56 Speaker 4
In a way that when she gets frustrated that she doesn't get the correct answer, but that's the good thing that she knows what will be the correct answers. And now it's about. How to tweak it so that she can, she can get what she needs.

01:18:12 Speaker 2
But, but as parent as well right now in term of healthy habits, you know, we want to make sure they eat, well eating well you know exercising sleep well and everything and phone. The the highest struggle is for parents now is actually on their phone. Yes yeah. In term of uh eating healthy food.

01:18:35 Speaker 6
Not so much. She's the power of the phone. Oh, the power of the phone, the power of social media, the power of games. Any.

01:18:49 Speaker 2
Like a very any tension, any experience having like a tension with your children because of phone?

01:18:56 Speaker 6
Yeah. Very often.

01:19:02 Speaker 2
It can lead to argument. Yeah. Any example what? Like what we, what we, the argument.

01:19:08 Speaker 6
Cause when when we ask him to stop, he will just uh uh continue. Then when you get angry and he will so like I mean, uh he also have his own temper. So oh when you show a temper, he also show a temper. So end up mom.

01:19:26 Speaker 3
Just clash right? Yeah.

01:19:29 Speaker 3
So. So everyone is experiencing the same.

01:19:31 Speaker 6
That's that's why the bump is more I mean uh. The mom is more to, to, him lah.

01:19:36 Speaker 8
Yeah. Oh my my daughter learning. Ah, learning. First first time, yeah from yeah, so

I also don't so much. So anything I will tell the sister check.

01:19:48 Speaker 3
Oh you,

01:19:49 Speaker 8
You ask the elders to check. Yeah oh, okay, so she say, uh I check no Instagram lah, no Facebook, no, that one ah, they told her not to have all these things, so she say, okay. Still young, right? Say okay lah, everything okay. But maybe they can change no after when thirteen fifteen this teenage. They don't have to be more careful. No.

01:20:16 Speaker 2
Problem to tell them to go and play outside, go exercise, run, play football.

01:20:23 Speaker 4
That's, the most part is sticking to the.

01:20:25 Speaker 2
Phone with the phone as well. Yeah, and bring the phone.

01:20:28 Speaker 4
Yeah, for me, I have to really tell her, "Let's go and have a walk." Uh, and then that's the time that she doesn't use it. Yeah. So, once in a week, we have that, that just walk through the in a canal like that. We protect that hours. But it's very difficult for other hours right if we are already at home. It's very difficult to really disentangle them and bring out even for lunch, dinner, weekend. It's very difficult.

01:20:59 Speaker 8
But food wise, maybe uh because I'm a housewife right so I cook. So they at school they only bring four dollars, but sometimes they never eat. Sometimes, you see nothing to eat because all this, the food is queue long lah. Sometimes, you just uh you know just uh it gives like uh stomach, right. And that's the only thing that they. Hungry, they buy. Then after that, water. They bring water from home. Don't bring water, so they they know how to save all these things. So uh basically I got no problem with that before that also, uh, we have FBS right in primary school, You got a FBS financial help assistance for low income. So uh they they have this four dollars, they tap whatever, if it is, they will try to finish it. Then after that, uh.

01:21:48 Speaker 8
They was like fasting month, right? That's what in a way that they will bring home the auntie know them, right? They went the auntie after school. I will bring back home. So when fasting month, right? I got no problem because the food is uh for them uh for for Hari Raya Puasa. So in that way also safe. Uh so uh basically uh then got porridge nowadays ah, they volunteer themselves even to eat porridge, drink tea.

01:22:21 Speaker 8
But yeah, that's very cute though. Yeah, you know, fussy. Yeah, cause uh. Fast food. Uh, I let them go uh when families with families. Uh, okay. Uh, the with friends only, yeah.

01:22:36 Speaker 3
Okay. Thank you for the sharing now because like we're we'reum what we're gonna do is that I know some people wrote like quite a lot of like, oh, um. These are the things that I really need to solve. Is there anything that's like your favorite thing, at the moment, like this one, we really need to like solve right now. Not because of like the intensity of it, But it's because of like, oh, this is something if if you cannot choose one, it's okay if you want to choose two, it's also fine. I know it's difficult to trim it down to like the most important thing, right? So choose one. And then.

01:23:18 Speaker 3
We're gonna make you choose the blind card, so we're not gonna show it yet.

01:23:26 Speaker 3
Just Choose first and then later on we're gonna show.

01:23:30 Speaker 2
The one that you think, yeah maybe yeah. So,

01:23:34 Speaker 3
You can use one dot to add to your the chosen one.

01:24:00 Speaker 3
Okay, This One Five minutes. This is not this is not fortune telling. I wish I could do that. I wish I could tell their fortune, but it's not thank You.

01:24:30 Speaker 3
Okay, You read each card, and then you have one minute to share your answer to everyone. That way everyone can also talk, right? So we start with Calvin first. So you show your card. What did you choose? Uh what did you pick? Does this work on a Tuesday or only on a Sunday? So you look at your board right now. Will it work on a Tuesday or on a weekend, Tuesday where you were. You know, your kid has like school days.

01:25:02 Speaker 7
Maybe you can share the.

01:25:03 Speaker 3
Challenge first and then we see. Oh yeah, true. Yeah, yeah. I'm sorry, I forgot about that. I'm sorry.

01:25:08 Speaker 9
The other challenge is needing uh to have daily reminders to set the phone aside

during dinner. So. Then the question would be does this work on a Tuesday or on a Sunday? I think Tuesday probably would be a more routine day, school day so it would work better because Sunday tend to be more relaxed, Tend to be, uh, your the the rules kind of be blurred a little. So I think it kind of work better on a Tuesday.

01:25:39 Speaker 8
Okay, next one. Okay, shall we find three users? Choosing friends lah Choosing friends.

01:25:46 Speaker 3
Okay. And oh, what's your card that you chose? Does this work on Tuesday or Sunday? I think this is like every day right?

01:25:58 Speaker 3
To choose a friend on Tuesday and Saturday, quite difficult. We, we let it. We I think yeah because I I don't think I can pick Tuesday friends and and Saturday friends as well. So we change. We change.

01:26:13 Speaker 8
Who else need to be involved? Parents? Teachers? Teachers. Yeah. Friends are that means the the people around her, uh she need to choose uh the correct one. And and have a good rapport with everybody. So as a parents, as a mother, you tell them I can be your friends. That means you can treat me as a friends to share everything, And your friends also can have sometimes they do not want to share with their parents lah. They can share with aunties lah because I consider as their friends also. So as an adult, what I think is your I put myself in your mother's shoes.

01:26:52 Speaker 8
Why she she has said my mother scold me because of this thing. So why your mother scold you as an what, What I think as a mother? Okay, this is what you have done wrong all these things. So advice according to the friends, If my my daughter will say, you know, don't worry, my mother understand, and you can talk to my mother. So it's the same to, My daughter so far, she don't go to anybody because I'm always with her and the sisters around. So um I told her that. Sometimes their parents is busy with working, so we are here. We can just help them, ah to to motivate them. Sometimes they. They um, To first with the bad one right They can just nowadays they just slash slash. That's quite common now. There is one one problem use, like one, then they they feed that. How many slash you do So? This is all the wrong thing Ah But so far don't have lah.

01:27:52 Speaker 8
But my last time girls have. But now the trend, I don't know how is it.

01:27:58 Speaker 2
But what's your uh the the middle one like how we.

01:28:03 Speaker 8
Know their their groups of friends and uh, their parents. So if we know their parents right so we can see their lifestyle, how is it? Maybe there's parents they are, they are. They are family is such a strict type, or they are very lenient type. So we have we have to know if their parents each that don't care one. You carry will not be happy, you see. So you can just advise the only one got.

01:28:27 Speaker 2
What do you do right now? Because I know with your girl, you ask her to show. Yeah. Your video call, how about their parents? How do you know?

01:28:36 Speaker 8
But the kids tell the parents that they know me. But introduction as yeah, uh, we talk to their Aisha mother uh so that so I will always have communication with my daughter. After school, then how's your day, of school today Ah, you a story Ah, what happened So when eating time also we will talk. So after that she will share whatever happen lah, like like uh from uh then you just listen only lah.

01:29:08 Speaker 2
No no parent chat group or.

01:29:11 Speaker 8
For you. No, because I told them, if you got a problem, you can just tell your parents to talk to me because I'm the one who tell them to have a group. Uh. Group call right, so their parents agree to it. So the parents say okay, okay can. So because uh Hadijah mother say we can do like that now. They also, no very naive so the parents right. So Hadijah mother say we can. Uh, do group, uh, get a group study, you know, uh from phone lah. So their mother say okay can can.

01:29:44 Speaker 3
Okay alright thank you thank you next one is.

01:29:48 Speaker 7
Mine isum, Uh, the challenge is choosing friends.

01:29:51 Speaker 3
Oh, same. Yes.

01:29:53 Speaker 7
Okay, so my card says what would you have to change? So for myself I thinkum I need to be more present. You know, sometimes we are not there when uh to see and understand who their friends really are. So I think that I can do more checking in checking ins with my son and my daughter and understand what their friend circle that they're mixing with. Yeah, I'm also thinking of like you know inviting them over. To our place. So and have a meal. So we get to know the children that they are actually mixing with like on birthdays. I mean, these are actually I'm also planning

all these now in our current life now going on, so like you know birthdays maybe have the kids over not just us. Maybe have their friends. Yeah, so we know how they talk. Oh, this child right You know and then we can.

01:30:47 Speaker 7
If we can advise, but it's up to them to choose their friends. Still, we only can say so much. Yeah, right. So I think I would make these changes for myself to be more present and understand what the friends that is mixing with. Yep. Thank you. That's why?

01:31:04 Speaker 6
So my challenge is to wake him up on time so that he won't be bunk. I mean, he won't be late for school and to avoid detention lah. Okay? So. So the question is, Will your team actually do this without being minded Yes, it depends on his mood. Actually, if his mood is good, five plus he already wake up. Ah, there's there's ah at one point of time where ah. He was always the first or second to reach school. Ah, whereas he always late. But uh at one point of time I I think what what his mood is. Yeah, he always wake up about five plus six o'clock. You already went out by six fifteen, six twenty, he was already at school.

01:31:44 Speaker 6
So the principal, when the principal, the teacher was was like, Said why he, what happened to this guy. Why was he so early So. That's why it depends on on his mood, actually. Uh huh. So uh I mean I mean uh. This is because we wanted to avoid detention for him, uh and one point also the teacher assisted by by even like. Uh. Giving him like encouragement in form of allowance. Okay, if this month you got no late coming, okay, we take you to McDonald. Ah, The teacher did help him in some way just to make sure that he doesn't come late to school.

01:32:28 Speaker 3
You mentioned about mood, right? So yeah, what affects his mood, how come like he's in a bad mood, or what what happens? Why he's a good one and bad one,

01:32:36 Speaker 6
Because he sleeps late in the night. So when you wake him up in the morning, he was like uh feeling like flustered uh because uh short hours of sleep, right? So it's all obvious. So that's where his mood changed. Then he will start to have like migraine, now all these kind of things.

01:32:57 Speaker 3
Now another question, if you take an earlier hour before sleeping, what is happening before he sleeps? What like is it.

01:33:06 Speaker 6
If he sleeps early, yeah, he sleeps early. Uh, he will himself wake up early. Uh, then he will like uh cheerfully get ready. Okay uh okay yeah I want to go to school

already uh. He will himself uh be like uh cheerful personality, but when he sleep late or. He sleep late into the night. Then we wake him up. So he tends to be faster than the way he moves changed. So once his mood changed, then he will uh bring it to the school. Ah so at school everything also become like like uh what he want you lah.

01:33:48 Speaker 3
Because you mentioned about Mobile Legends, so we're thinking like is it because of the gaming and using the phone? Yeah,

01:33:54 Speaker 2
There's a penalty being played. Okay okay. What did you write that could help in the middle?

01:33:59 Speaker 6
Uh like I said uh.

01:34:02 Speaker 6
I be the person to wake him up and make sure he wake up, okay. Then uh, the teacher also assisted us by, if like let's say by seven twenty five he's not at school, the teacher will just immediately message me. Hey, your son is not in school yet. So then I know that he's late. Uh. So and another way, the teacher is uh helping by giving the encouragement lah in terms of allowance. And hmm,

01:34:30 Speaker 2
How about? Have you tried anything to manage the phone at night before,

01:34:36 Speaker 6
Um, like I tell you, it's difficult to manage. Ah, That's why that's why the the new law that ah our government is having to prevent usage of ah phone at school. That is already have some part of it, But I mean if they can go along like to some other countries where they cut off all this ah. Social media to child below sixteen or below seventy, I think there will be much more help to to curb their their phone usage lah. Because because for us, for us to curb is quite difficult because the phone is with them. If we confiscate the phone, Then we will have uh another issue in terms of uh having to to I mean to uh follow the.

01:35:27 Speaker 6
Temper, the angerness, how we confiscate their phone. Because I did I did that before confiscate. But end up, he's becoming more rebel than than listening to you. Ah so, the the psychology ah warfare is there lah.

01:35:44 Speaker 3
Different from your girl or? Yeah different. Girl is more like she can handle it.

01:35:48 Speaker 6
My girl strictly ten o'clock sleep, okay, then morning wake up, okay, go to school come back on time that that's why it's different, totally different. Yeah, there's there's this challenge I'm taking care of the girl and the boy. There's there's a challenge, frankly speaking.

01:36:04 Speaker 3
Thank you so much for sharing. So we have next slide.

01:36:07 Speaker 5
Okay, so for myself, the challenges are phone screen time and also friends'influence. Also? Friends'influence on me. Yeah So what I have to change is actually uh, I change myself, basically instead of changing my girl, I change myself, Yeah, so I sacrifice by maybe taking leave to join, parent support group events to get to know her circle of friends. Basically, yeah. So I told her that, I I could I may have difficulty changing you because she's quite stubborn sometimes. Yeah, especially at this rebellious age. Ah, I don't want to change her because my elder boy, I tried to change him in the end he's quite more rebellious.

01:36:54 Speaker 5
More defensible, yeah. So, boy, he can just go to his friend's home and stay overnight. But I can't afford my girl to stay overnight at her friend's house. Girls are more dangerous. Yeah, so I don't want that to happen. So I might as well change myself. So I also don't want to confiscate the phone because some uh, early this year January. Uh there's a P six girl actually run away from home end up at To FDV. The all the parents to search around Singapore for her. She end up in, she she's staying in Punggol, but she ended up in Tampines Hub. At about four plus ten, the police managed to locate her. So I don't want that to happen with my kids. So that's why I, I talk to my wife. Uh guy are more strict on children. So woman are more gentle, more uh patient teaching kids. So I say.

01:37:50 Speaker 5
If I if I get start to get over the line, you have to step in, to control kids because I don't want to, blast my temper out there basically yeah.

01:38:01 Speaker 3
So you have tried before in a way to.

01:38:04 Speaker 5
Or my boy.

01:38:05 Speaker 3
Yeah yeah but then he did the he.

01:38:07 Speaker 5
Stepped over and trespassing yeah. He he told the friend's father that, he got the

approval to go to his house to have barbecue session, but I looked at my phone no I didn't see any message coming in. My wife also say no, so in the end, The last message uh was saying that uh, he, his phone is going to battery died. That's the last message. Then after that, he fell asleep. That's what he told the father, the friend's father. So at about uh eleven plus almost twelve night, he sense that something is wrong. He normally won't uh come back home so late. That was when he was in S E C one if I'm not wrong. So on Saturday night, So I told my wife, although there's a there turn, there's a rule said that.

01:38:48 Speaker 5
Within twenty four hours, if the boy is not back or the child is not back, you can start to report. Miss, I say no. We can wait for the twenty four hours. We have to take action. So luckily, The IO managed to use the Intel service to check what is his last location that I managed to locate my boy at Sengkang on a condo unit. Yeah, so the uh police asked the uh the boy's father to call us. So said eh you as a parent, you have come down and fetch him personally. So that we know that you are the parents, so over the phone I also confront uh the the boy's father. I mean, Although it's not right for me to confront, because he he may not know everything. He thought that maybe my boys being honest telling that they got approval, but actually no. I told the boy's father say no. He never got any approval from myself or my wife, But at the same time, you as a parent, you should really ensure the boy achieve. There is a cut off time by ten. You should actually make sure the boys are all away from your house, not.

01:39:45 Speaker 5
After ten still around, never check back in the body. It's already very. How come you're still not going back home You're still around. Yeah, something is wrong, unless you're playing Mobile Legend, Okay, Understand it's twenty four hours, maybe, but playing mobile legend or football mobile, you shouldn't even stay overnight like so late. Yeah So luckily the fathers, let the boy's father apologize. He said, yeah. He on the hindsight, he overlooked this safety aspect. Yeah So. He also learned a lesson and he make sure.

01:40:15 Speaker 5
But however, his his boy friends came over to play. He have to make sure the boys are actually by certain time. They actually have to go back home and then some. Yeah. Thank you Thank you Thank you,

01:40:27 Speaker 4
And next one, Parker Oh I have I've chosen one of the tougher one. Uh I think it it is rooted from my worry about the children's future. I think most of the career is going to beum destroyed by the AI coming. Now, as a software developer, it's not easy to find job. And then back with I mean now if we trace back, it's about the academy versus the fun projects at school. So government trying to advocate that it is not

only just about the academic achievement, but it's a well rounded holistic program. Of course I also want her to have these fun projects. Who wants to be doing.

01:41:11 Speaker 4
Mathematic solution, if there is a chance to interview Joseph schooling, right. So so I really want to to do encourage her on that. But at the same time, it's always at the back of my mind that the challenge now is about how she can get a job, how to motivate her to to find. Um what's the purpose in life? So after this academic life is over, what do you want to be? How do you want to earn your living? And. She is still very, very young. I think, first of all, I also need to change myself that there is always a time for her to think about it. But after we've just been through PSLE, which is the most grueling time. I feel that there is very little room for error in Singapore that even in PSLE time, we have already been classified.

01:42:07 Speaker 4
So, Anything less than perfection is going to be very difficult to secure a good future here. So, my card is who else needs to be involved? First thing first is about ourselves having to help her to find the motivation, right? But, it's also about government to make it all the educations, the privileges of educations that right now is still. Very much restricted to the elite class, to be more accessible to others. Um, more opportunities for the youth, for the young people. I mean we keep on reading about the unemployment after they finish school. What can they get? And because of this reading, because of the P S L E, I just find that the thirteen years old is not so young anymore. They need to start thinking about what will happen in.

01:43:05 Speaker 4
Eight years time, so there is no NS for girls, but yes, eight years time is very little time for them.

01:43:12 Speaker 3
So I want to understand as well because I'm quite curious, because when you mentioned about there was a previous card that you had that she ruminates, you know sometimes she will be like stressed and everything. Are those signals like where's that stress coming from? Is it like peers, school or anything or is she feeling that kind of pressure?

01:43:34 Speaker 4
So in P six, There there was definitely a pressure of P S L E right, especially when in in P five. It's not in P six alone, because in P, five, uh, somehow the schools uh, most of the schools they tried to increase the benchmark. They wanted to, For for the students to feel it that what will be the the level in P S L E that required the rigor of uh keep on studying until the end. So that was her academic stress but right now. Uh, I think less academic demand. I don't know why she is in the IP. Uh, so it's a express to J C. I don't see that there are a lot of uh there. There are lots of academic

pressure, but a lot of group projects. So, she's starting to have this conflict with friends that they don't give the same effort. And uh and have conflict with uh.

01:44:31 Speaker 4
Teachers, we are in a more religious school because of that, some teachers could try to interperse their agenda as well. So, the stress is quite different. But I am very sure nearer to the I don't know the the IB time, I think she will have another academic pressure. Yeah so, I think that most of the children, if they are given a choice and opportunities, they also want to tackle the softer aspects that are needed in life. But this society in Singapore is just unforgiving. Academics still need to be the number one. We.

01:45:18 Speaker 12
Met me earlier and you see me humber.

01:45:23 Speaker 12
My name is Mario. I'm one of yours. I'm a parent, except my kid's 18 and only have one. We're going to the end of our session and I just want to respect all of our time. Um, I'm still super curious. You've talked about a lot of ideas and a lot of suggestions, like small little things like you could do a bit more this, you could do a little bit less that good. Go around the table and you name me one thing. Don't have to explain. Don't have to explain, just doesn't have to be yours. Not a competition. Maybe you heard something, you go like this one, maybe you tried, maybe you want to try. I'm just curious. Can I can I can I ask? Can I ask you? What, what do you think is like if we picked one of the ideas that you heard or that you gave? That's the idea we should do.

01:46:23 Speaker 12
Don't have to explain why. Just, just the idea.

01:46:30 Speaker 6
The idea of working closely with the schools on on on the the I mean, the going up of the child itself.

01:46:44 Speaker 12
Yeah, working working with schools finding schools yeah finding a role there yeah.

01:46:53 Speaker 12
Did you both found, did you have one that stayed with you?

01:47:02 Speaker 9
Probably I could share from my personal experience. Of my daughter, probably just after P S L E, me and my wife were having a bit of issues. She would come back home, She would shut the door, and then she would not talk to us for a good entire year. Yeah. Um and then we, we we gave her time, Uh, we probe what happened. And eventually, we found out that actually, she had this group of friends in school.

Probably about six six of them, and they kind of uh shuffle aside ridicule her. And then uh make fun of her, and it became a very toxic relationship between the friends, and ultimately they kind of uh. Kind of. Got her out the group in a sense, so she was having a very difficult time.

01:47:51 Speaker 9
Um, expressing it and um didn't know how to actually. Yeah, release the emotions as well. So we, We were glad that we gave her time, and it was it was a difficult period because we kept probing, we kept uh asking her, We kept uh finding out what happened and initial portion she didn't, she didn't speak. It was only almost until towards the end portion, she kind of broke down and told us everything. So um it is really about, Giving them time, uh, being sensitive to them and uh, yeah, just just being there for them. That helps.

01:48:30 Speaker 12
Yeah. I hear you and I recognize some of it. Yeah.

01:48:38 Speaker 7
And I thinkum I go withum talking more about the future with my child because as what she Katika says, um I mean, we are all results driven and stuff. But apart from that, What do you want to do in the future? What? Do you want to become I think it's one important topic that uh, we need to engage our children with. And apart from that, if I wanna do something is um build a trust. I think working on trust is very important. If the trust is broken and at this stage, if it's broken, Then you can't mend it when they are eighteen, or you know when they reach that certain age. So like even like going out, we ask questions like.

01:49:21 Speaker 7
Who are you doing with? Are you sure it's this friend? The child snaps. Yeah, he's like, you don't trust me. I mean, I mean this just happened at home. Maybe, we just went through a storm here of stuff and father and son issues and all these trust. Everything is about trust basically. So I think yeah for myself I need to work on that.

01:49:43 Speaker 12
So is it even yeah that I get that up? Um so it's it has a role like, I'm almost hearing like, don't don't parent all the time, but also build something a bit more and that then helps them, you know, If we want to have them do more healthy habits or or go to bed on time. Maybe they do it faster because I don't feel parent parents anymore. Is that what I'm hearing?

01:50:10 Speaker 7
No. I mean it's more like a kind of fine, you know, give and take a bit. Yeah. I mean, they have their opinions at this age. They they are very big on their opinions and that they are right. But you know. As a parent, you must be a bit more authoritative. I think, I mean, there are four parenting philosophies. So the one that we are mostly

looking at is the authoritative parenting. Expect, so you have the final say, but you need to reason with your child as to why certain things work or don't work and listen to them at the same time. Yes. Yeah, You have to not just be your voice, but it has to be two ways lah, both ways Thank you.

01:50:50 Speaker 12
Thank you. I wanted to check with Ryan because you have like three kids, three different ages, right? Yeah. So was there something that you learned from having your older boy and and you did differently with your younger? Yes. What was the one thing that now comes to mind when I ask that, Like the one thing that you go, this didn't work, but now I do it this way.

01:51:16 Speaker 5
Uh I should say my elder boy is a guinea pig. Right. Yeah, because she taught me how to be a better daddy, in a way, in a sense. Yeah, Because I thought that as a guy, you should always be strict and firm with your kid. Just like when I was small. Because I'm my mom brought me up, my dad was always busy working. So my mom always say yes, I say yes. Say no means no. Ah go home back from school straight away for ah let me straight away from school. Go back home is straight away. Go back home.

01:51:49 Speaker 5
So I make sure my boy also follows something with. Then even though I was in overseas, I also instill this sort of go back home straight away from school, there are rules on my elder boy. But by the time he's set one, he has his own friends. The the the kite like what she mentioned it just broke. Yeah, I can't I couldn't even have the opportunity to pull him out a bit and pull back in a bit. I don't have such luxury at all.

01:52:18 Speaker 12
Your Own role model got you to one point, but you have to change it. Yes, yeah, I heard. Yeah,

01:52:27 Speaker 5
Correct. Then, Worst of all, is the second child is a girl, makes it even more as I did for me. Yeah, i couldn't afford to let him. I couldn't complete the same mistake as my elder boy or yeah, if if i do the same thing as i control my boy on her. The help,

01:52:47 Speaker 12
Right? Yeah, but that's good to hear, right? That, we as parents, we still have that awareness that what worked year one, you know, not going to keep working. Yeah. You have something on your mind I can tell. Real quick like likeum to bring it back to our close an activity that still sits in your head. Like like, oh, maybe I should try or keep doing so that I that I keep my child sort of on the right path, but also a little bit of freedom. What comes to mind?

01:53:26 Speaker 4
Because I think a little whether coffins feel the same way because we only have one. There is no way that we say that okay, personality doesn't match. So maybe I try with the other one first. Yeah, I just need to keep on. Yeah, if it's a it's a trial and error with the same person again and again, I think. We just have to tolerate each other. That I'm a first time mom, so is she, a first time teenager. We just have to try to make it work and I think we work well together. Outbursts happen. To be very honest, I don't feel worried so much about her finding a good circle of friends, Her finding the good screen time or things like that, because I feel that this is within our control. She will.

01:54:12 Speaker 4
Understand it someday. I will also understand it someday. Uh, we will find a way. Uh, but I'm really more worried. Everything is more about the future because of this whole disruption. And then because of the very scarce opportunity that we have here. And I feel that growing up, I myself not growing up in Singapore, but I feel that as children, i i saw that from my niece nephews and growing up, They are always being sharpened on their competitiveness instead of being cooperative. And as a human society, Cooperation can bring us far than the competition that we just need to fight for uh primary school allocations. And it all goes on and on until you find a career.

01:55:01 Speaker 12
And you can pick that up, okay. We're not using the same word always, but I'm hearing a lot of we have to find that cooperation. With our child, what works with that person, even though they're the sibling of that other person where other things work. Or you know, with our one child. Was there one idea that you're still resonating with? Like one different thing or one new thing that came from us being together that you feel like," Ah yeah, for my children I Can."

01:55:41 Speaker 8
Bonding, very important. Yeah,

01:55:45 Speaker 12
I'm sure, there's like one, if you, if I mean, let me go teacher on, you can only pick one of the many, the one that you have to pick is which one?

01:55:57 Speaker 1
Discipline. From being meaningful, Yeah.

01:56:03 Speaker 12
Can I check is it discipline or routine or is it the same thing? Discipline. Discipline. Why not routine?

01:56:10 Speaker 8
Routine you can change. Oh. Discipline, that is, this is the thing that you have to do.

This is the correct way and do it the right way. From young lah.

01:56:29 Speaker 12
Yeah, just uh keeping our time in mind because we are three minutes over. Um. Sorry?

01:56:38 Speaker 3
No discussion, we have one last thing to fill up. I think you have a page. Yes,

01:56:44 Speaker 12
However, our session runs forward, right? Let's respect the time of our participants. Thank you. This to put context to why we are here.: We are partnering people from A and B;. They were sitting down here. Because it is on our minds, and it is on our government's mind that the path for youth can be more optimized now, but not that things can be better for our youth, be better for our parents. Now, What we don't want to do is come up with our ideas and then come and tell you. This is a better idea. We want to hear them from you first. That was today's.

01:57:39 Speaker 12
There's actually a part B to this. We're also going to hear to children like yours. That will be tomorrow, and we're going we're going to have similar questions for them. Healthy habits important, right? So why not? Why not do you know fast food bad. So why And try to understand how do we influence without telling them? How do we keep them.

01:58:08 Speaker 12
In a lane between guardrails, well, what guardrails? How do you help with that without telling you how to parent? So, yeah, not easy. But today gave us a lot. And today is that step toward it. What will come out of this is an idea of what we call prototype. Familiar with the word? It's okay, if you are not a prototype as we build something that captured an idea or an. Tension of what we think will work, and then we bring that back to parents like yourself. Maybe some of you again because you were in the room today, you know our discussion. And so we want to check with you if all that we talked about, we put together an idea can it work for you? We also talk to parents that never had this conversation because I want to make sure does it matter? And then we do the same thing for children. We let them give us ideas, right? We believe that they have thoughts.

01:59:08 Speaker 12
Of what could work for them. That may go against some of our rules, And then we need to design around that so that you feel respected as parents and youth feels. And so that's the process that we do. That will actually happen within the next two weeks. So some of you, we will talk to you again, And we'll talk to new parents about that idea that we make based on our conversation today. Thank you so much for your time.

01:59:39 Speaker 12
With this, we're at the end of our session. So once again, gratitude. Grab a few snacks or a drink on your way out. Bathrooms at the back in case you have a bit of a travel. And we'll talk to some of you really soon again. Thank you.

02:00:09 Speaker 1
Yeah.

02:00:38 Speaker 12
For the exhibition, like, what do you mean? Also, horses like real. Yeah, I just for fun. Oh no, it's yeah. We took a family trip to New Zealand, and then we did like a search for whales in a chestnut. And they had that as like you know merchandising. Oh funny cool Where are you from originally? I am from Belgium but I am Singaporean now because of marriage and all that. Nice thank you, Yeah.

02:01:37 Speaker 1
Yeah, it'd be out like a.

02:02:38 Speaker 1
Yeah.

02:07:17 Speaker 1
Thank you.

02:10:17 Speaker 1
Look at me.

02:11:49 Speaker 1
Thank you so much.
